

# It's blue! It's New!

## TWIRL'BLUE

### Application

Labplas introduces a new line of products specifically for the food industry. In food factories, several tests must be performed on surfaces which come into contact with food as well as environmental surfaces, to determine whether the plant is contaminated or not. Collecting samples requires sterile equipment and must be done meticulously to avoid possible sample contaminations.

Foreign matter contamination is a possibility in the food industry, therefore Twirl'Blue sterile bags are highly visible in order to work alongside your diligence and avoid possible product recalls.

### Features & Benefits

- Blue color tear-off for increased visibility;
- Distinct color to avoid possible foreign matter contamination;
- Clear visual recognition so can be used to segregate samples from different areas within the factory environment;
- Made with virgin Polyethylene, food contact approved;
- Optimized opening area to facilitate insertion of sample;
- Lot number traceability for every product;
- Bags accommodate solid, semi-solid and liquid compounds;
- All sterile sampling bags are also R-NASE, D-NASE and Pyrogen free.

### Product technical specification

Code	Description	mils	micr	in x in	mm x mm	oz	ml	Packaging
EPR-4590-B	Polyethylene blue sterile bags	2.5	63	4.5 x 9	114 x 229	15	450	Cs/1000 (2 x 500)

## Accessories to the line!

**TWIRL BLUE**

### STERILE BLUE GLOVES:

- Made of polyethylene;
- Gamma sterilized.

Packaging: 1 box of 50 pairs of gloves (wrapped in pairs)

Product code: SA7-GLOVES

### DETECTABLE BLUE PEN:

Detectable Retractable Blue Clip Pens.

Ideal for use where a one piece pen is stipulated.

- Made with Polymer FDA approved material;
- Entirely metal detectable & X-ray visible;
- Triangular cross section for a comfy yet sturdy grip.

Packaging: 1 box of 10 individually wrapped pens

Product code SA6-DETECPEN
